

PLEASE READ CAREFULLY

MAINTENANCE & CARE

Congratulations!

Your bathtub has been refinished with the most durable refinishing system available in the industry. It has been used in over 4 million successful applications nationwide, and by following the guidelines listed below, you will be assured many years of trouble-free service.

Please **DO NOT use this surface for 24 hours**. Although the refinished surface can be put back to full use after this time, the surface will actually require up to 10 days to fully cure.

Please observe the following:

1. During the refinishing process, special masking tape was used, which will protect other surfaces during the drying and curing but can be easily removed by you. Remove this masking after the initial downtime, but within 1 week after the designated down time. Care should be taken when removing the masking from wallpaper, or painted surfaces, so remove the masking slowly and carefully.
2. Clean the finish regularly with soap and sponge (this is called surface conditioning) PLEASE NOTE: all newly refinished surfaces will have some surface dust, which will have settled onto the new surface. Do not be alarmed because the surface is still within its long-term cure period, normal use and regular cleaning will remove all minor surface dust marks
3. When removing the masking from around the drain area, be careful not to break the seal around the drain shoe. Any glaze which is left on the surface of the drain shoe can be carefully removed with a razor blade or knife.
4. DO NOT lay soap, bottles, or any other objects on finished surface as this will void the warranty.
5. Be sure that your faucet taps are dry and not dripping after using the fixture and be sure to towel dry the refinished surface.

Long Term Care

1. **DO NOT** use any abrasive cleaners on or near the refinished surface. Your new glossy finish is easily cleaned with any mild liquid cleaner, and should be cleaned after each use. In general, any cleaner approved for use on acrylic surfaces is OK to use. (A door hanger with recommended cleaners is also available)
2. **DO NOT** use any abrasive scrubbing pads, such as "Scotch Brite" or any similar scrubbing pad, as this will scratch the new surface.
3. **DO NOT** drop sharp or heavy objects on finish, which may cause it to chip. Contact CENTRAL REFINISHING immediately for repairs if this should occur. Failure to do so in a timely manner can result in further damage and will void the warranty.
4. Faucets must be properly maintained by the owner and user, to protect the new surface. Leaky faucets will erode the new finish, causing it to crack and wear out prematurely, and voiding the warranty.
5. Destruction of the finish may occur through improper use of acid bearing compounds, such as drain openers or tile grout cleaners. All chemicals must be kept away from the finish. These chemicals include, but are not limited to, cosmetics, hair dyes and perfumes, which may stain or otherwise mar the finish. Introduction of any of these chemicals onto the finish would be considered neglect and void the warranty.
6. **DO NOT** use a rubber bath mat. Most mats will produce a reaction with the new surface when subjected to hot water. A safety tread has been applied to the bottom of the tub, and this will prevent the surface from being slippery.

REMEMBER, if you treat your new surface with respect, clean it regularly, and follow the above guidelines, the refinished surface will stay shiny and bright, and give you many years of trouble free service.

THE REFINISHED SURFACE IS GUARANTEED AGAINST FADING, PEELING OR CRACKING, THIS GUARANTEE DOES NOT APPLY TO CUSTOMER NEGLIGENCE OF THE ABOVE LISTED ITEMS. THE TENANT HAS FULL RESPONSIBILITY TO PROPERLY MAINTAIN THE REFINISHED SURFACE, AND ANY REPAIRS COULD BE CHARGED TO THE TENANT'S ACCOUNT.
